Megahertz Broadcast Systems (MHz) is a major independent player in the international broadcast systems integration business and has been in operation since 1985. A subsidiary of Canadian technology integration company, AZCAR Technologies Incorporated, MHz has completed turnkey projects for some of the world's leading broadcasters, telecommunications and digital media companies. MHz has a global reputation for building mobile OB and DSNG vehicles in addition to the implementation of tapeless HD file-based workflows, fixed earth stations, broadcast and AVIT facilities at stadiums and religious venues worldwide. MHz's experience covers every aspect of systems implementation from engineering planning and wiring, design, project management to product evaluation, commissioning, training, support and IT services. Its one-stop-shop approach includes coach building and wood working facilities all in-house.

**PRODUCT PORTFOLIO**

Internet distribution - satellite ground stations (fixed uplinks) - television transmitters - multiplexers - video on demand servers and systems - interactive headends - master control switchers - subtitling systems - teletext and MHEG systems - content creation - business and technology - change management - investment planning - work processes - maintenance contracts - digital signage systems - mobile units including SNG and outside broadcast remote trucks - other infrastructure - playout - studio and production.

**SECTOR CAPABILITY**
