

Winners announced in European IT and Software Excellence Awards 2017

[London, 31 March 2017] The winners in the **European IT & Software Excellence Awards 2017** (www.iteawards.com) - the leading pan-European awards for resellers, ISVs, Solution Providers and Systems Integrators and their vendor and distributor partners – have been revealed at a gala dinner in London on 30 March.

“Not only did we have a record number of entries and votes from the industry, but the quality was even higher than previous years and confirms our view that Europe has entered a new era of IT confidence,” says John Garratt, Editor of *IT Europa* and head of the judges panel. “It is up to us as an industry to take these ideas out to the market, to show the general media, politicians and governments that the industry is not all about security threats and scare stories, but regularly delivers great productivity gains to ordinary businesses and people. The evidence is in the projects that we have highlighted with our selection of finalists and winners.”

Now in their ninth year, the European IT & Software Excellence Awards 2017 attracted more than 500 entries. The awards were given for IT solutions that get to the heart of customer issues, delivering better business, a clearer understanding of data, and more efficient and profitable outcomes. 100 companies from 28 countries were represented amongst the finalists.

The judges, with many decades of experience of IT industry involvement between them, have arrived at a list of winners that they believe truly reflects both the strength of Europe's IT industry and many of the changes in direction occurring within it.
